Product Code

CM1220

Available in Sizes

400X450X240MM

Available in Colours

Green
CM1220

Ready for both indoor and outdoor use, the AIVIA®210 is a keypad access AED wall cabinet, suitable for storing any brand of AED.
Robust and lightweight, the modern design of the AIVIA® 210 is composed of two distinct parts : - A clear anti-UV treated polycarbonate cover - A green ABS frame which complies with ISO 3864, International Standard concerning emergency colour codes. These materials are well known in many industries for their shock resistant properties. The AIVIA® 210 is rated IK10 which shows an efficient protection against external mechanical impacts

The AIVIA® 210 is a restricted access cabinet, secured by a 4-digit code. The AED is available to authorized people in case of an emergency. Opening the AIVIA® 210 with the pre-set user code triggers a visual alarm with flashing red LEDs. An audible alarm (103dB) will be operational if the locking mechanism is forced when the door is opened. A maintenance code is also available for maintenance purpose.

Key Features

- Perfect indoor or outdoor solution to protecting and storing your defibrillator
- Designed with two sections providing amazing shock resistance properties
- Combines a Polycarbonate cover with an ABS chassis as 2 distinct parts
- Internal heating to keep your defibrillator at optimum performance temperature
