

## MSA Workman Rescuer 15M Stainless Steel Cable

Product Code

MSA10158192

Available in Sizes

**15M**

Available in Colours

Black  
MSA10158192

MSA's Workman Rescuer provides fast, easy and intuitive fall protection with integral bi-directional retrieval capability. Not only does the Workman Rescuer arrest the fall, its retrieval capability allows the fallen worker to ascend or descend to a safe location. This durable, economical addition to the Workman Series of products offers fast installation and setup, ideal for applications where time and ease of use are a priority. The Workman Rescuer is also a stand-alone retractable device, as the carrying handle may be used as an anchorage attachment.

Exclusive integral bracket uses existing tripod pin, leaving fewer components to attach, or become damaged or misplaced. Fall protection/retrieval mode knob simply pulls and rotates to activate. Use this device as a component of a confined space system for one application and as a standard self-retracting lanyard for another.

- Experienced and even novice users can learn setup and operation quickly
- Effectively comparable size and weight to competitive products
- Great for OGP turnarounds, construction, utilities and other confined space applications
- Galvanized or stainless steel 5 mm wire rope
- Integral mounting bracket
- Color-coded switch for retrieval mechanism activation
- Ergonomic, stainless steel carrying handle can also be used as anchorage connection point
- Built-in shock absorber
- Robust aluminium housing with thermoplastic bumpers
- Self-locking swivel snaphook with load indicator
- Stowable, foldable crank handle
- RFID-enabled
- Maximum arresting force 6kN
- Certified to EN 360, EN 1496, Class B
