DATASHEET

WOMENS HI-VIS WORK JOGGERS

The Beeswift Alton Hi-Vis Work Joggers are purpose-built to support women in the workplace, combining high-performance features with a fit that works with you, not against you. Lightweight, flexible, and made using 92% recycled polyester, Alton joggers deliver comfort and sustainability without compromise.

Engineered with a women's-specific cut, these joggers offer a more contoured fit through the hips and legs, ensuring freedom of movement, comfort, and confidence all day long. The 4-way stretch fabric, water-repellent finish, and Class 1 high visibility make them ideal for dynamic, fast-paced environments.

Thoughtfully designed with reinforced knee panels, tapered legs, and elasticated ankle hems, the Alton joggers blend durability and style in one work-ready package. Storage is smart and secure with angled hip pockets, cargo pockets, and additional features like pen holders and zipped pockets.

The contrast elasticated waistband with adjustable drawcord provides all-day comfort, while reflective segmented tape stretches with the garment, keeping you seen and supported through every shift.

Certified to EN ISO 13688:2013+A1:2021, EN ISO 20471:2013+A1:2016 and RIS – 3279 – TOM Issue 2 Railway use Certified (orange only), these joggers are your go-to for professional-grade performance with a fit designed for you.
